Sentenced Population- Violent Crime & Risk Report 10/31/2020

This report contains point-in-time analyses that are up-to-date as of 10pm on the date listed. The information in this report *includes incarcerated individuals who were sentenced for their crime(s) in Vermont in-state and out-of-state facilities*. See below and the next page for an explanation of the information contained in this report.

Risk to Reoffend:

The VT DOC utilizes the Ohio Risk Assessment System (ORAS) to determine an offender's risk to reoffend or commit another crime. This measure is used for individuals being housed in correctional facilities and those under community supervision. The department uses the following instruments:

Prison Intake Tool (PIT):
Provided to all incarcerated individuals sentenced to a year or longer in a correctional facility. Informs risk reduction programming (RRP) eligibility. 4 levels of risk, with scores varying by gender: Low, Moderate, High, Very High

Community Supervision Tool (CST):
Administered to offenders under community supervision: within 2 weeks of intake, 3 months after release from incarceration to community supervision, and/or annually and/or upon significant changes in community status. 4 levels of risk, with scores varying by gender: Low, Moderate, High, Very High

Reentry Tools:
Administered to incarcerated individuals sentenced to a year or longer. Provided within 6-8 weeks before being released to the community. 3 levels of risk, with scores varying by gender: Low, Moderate, High

Violent Crime Status:

Offenders convicted of one or more statutorily listed offenses outlined in 13 VSA §5301 are deemed to have committed a violent crime, referred to as "listed" in our system. Examples of violent (or listed) crimes include but are not limited to: murder, aggravated assault, sexual assault, burglary, driving under the influence, sale or delivery of illicit drugs. This report uses the "listed" crimes as proxy for violent crimes.

Due to the nature of these crimes, special consideration toward victims is required in release decision making. Committing a violent crime does not always directly correlate with an offender's risk to reoffend.
