1	1	6	<p>The directions that were attached to expunge or seal a record are fine if there is only that one docket to get rid of. The directions are not for multiple dockets along with that deferred one. I would like to have directions written to tell us what exactly needs to be deleted. For example do we delete the alerts if there was one, do we delete the grievances, etc. I just would like to see more detailed instructions for expunging for what to get rid of. Also the admins should be able to delete contact notes, if we can expunge a whole record, dockets, etc we should be able to have the capability to delete contact notes. It would make it easier for IT and for whoever is expunging.</p>	<p>Thank you for your feedback. We have provided more clarity on specifically how to expunge a record in OMS.</p>
