1. Requests for Proposals

Both individuals and agencies may apply.

The Vermont Department of Corrections has an obligation to the public and the offender population to provide services targeting the risks and offenses of the offender population. VT DOC employs Evidenced Based Principles for working effectively with risk offenders; specifically, the Risk-Needs-Responsivity model. VT DOC assesses offender risk areas, targets criminogenic need areas, and utilizes a multidisciplinary approach for targeted intervention. Services provided are in a group model aligning with the evidence-based interventions. Cognitive behavioral and motivational interventions are used in conjunction with the consideration of responsivity factors to improve engagement and a structure of supervision to support fidelity and consistency in program delivery.

The Northern State Correctional Facility (NSCF) in Newport, VT provides these services to moderate to high risk for recidivism offenders. VT DOC is seeking proposals for contracted staff to provide interventions and clinical guidance to reduce risk of recidivism. Targeted interventions include coping skills, substance abuse intervention, offense specific interventions, anger and aggression interventions and pro social and healthy relationship skill development. VT DOC is one (1) full time Clinical Lead Interventionist. VT DOC is seeking a masters-level Lead Interventionist, to provide oversight and clinical guidance to contracted facilitators, internally referenced as Risk Reduction Interventionists. The Lead Interventionist is also expected to facilitate some manualized curricula groups.

Risk Reduction Programming is a cognitive-behavioral intervention program. The overall goal of the program is for offenders to learn new prosocial skills and apply those skills to their lives. Focus areas include enhancing self-regulation, respect for others, and coping skills to avoid re-offense and create a prosocial, meaningful, future-oriented life plan.

VT DOC Risk Intervention Services (RIS) is an integrated model of risk reducing services provided to moderate and high-risk offenders. RIS includes direct intervention services, Corrections Education, and Vermont Correctional Industries (VCI). Corrections Education provides offenders ongoing education and literacy support, specialized cognitive assessment and services, workforce readiness training, and more standard high school curricula and diplomas. In facilities, VCI provides offenders a real-world setting in which to practice their professional and prosocial skills, including collaboration, cooperation, and supervision.

These three aspects of RIS are coordinated by the Risk Intervention Services Coordinator (RISC). The RISC assists offenders in navigating through RIS, confirms risk-need areas are being addressed by the set of services provided to the offender, and maintains records on all program referrals and participants.

The current intervention structure includes facilitation of several manualized curricula. Groups may involve targeted intervention to specific offender populations. These populations may include violent offenders, youthful/young adult offenders, those with cognitive and/or mental health accommodations, and others. VT DOC is seeking proposals that address ways to reach the goals and target population.
After contracts are awarded, the DOC will provide training and consultation to the Lead Interventionist the areas of clinical supervision, offender characteristics, assessment, treatment, management, and facilitation of manualized curriculum.

Anticipated contract period will be two years with option to renew for two additional years. The option to renew will be based upon performance of contractor and continued funding.
