

UPDATED April 20, 2020

VERMONT DEPARTMENT OF CORRECTIONS

COVID-19 GUIDELINES - Facility

Operational Guidelines for COVID-19 Response will be updated frequently to incorporate the latest scientific, medical, and governmental recommendations. Please ensure you are using the most current document.

Definitions

- a. **Medical Isolation:** The physical separation of ill persons (positive Covid-19 test and/or the presence of symptoms: fever, cough, or respiratory distress) from those who are not ill in order to prevent the spread of disease-causing germs.
- b. **Medical Quarantine:** The physical separation of persons who have been exposed (had close contact but have no symptoms) to assess whether they develop viral symptoms.
- c. **Intake Quarantine:** The physical separation of the persons lodged from the community and current inmates returning from an ER transport.
- d. **Close contact:** For the purpose of this protocol, close contact is defined as 6 feet or less from another person or in an area contaminated by their respirations.

- e. **Cohorting:** inmates on the same status (e.g., two inmates both designated for Isolation) may be housed together. Inmates on different statuses (e.g., one designated for Quarantine and one for Isolation) should not be housed together.
- f. **Vulnerable:** Vulnerable will be used as defined by the CDC as, “at higher risk.” Those currently listed are: adults over the age of 65; pregnant women; and those with heart disease, lung disease, or diabetes. Please check the CDC link as these groups may change as new medical information becomes available.
<https://www.cdc.gov/coronavirus/2019-ncov/specific-groups/high-risk-complications.html> Staff designated as vulnerable will not be used to work Isolation or Quarantine units, nor will they be assigned to transport inmates designated for Isolation. It is the staff’s responsibility to notify their supervisor of this information and, if requested, to provide documentation from their healthcare provider.
- g. **Tyvek Suit:** Protection for workers who deal with hazardous materials and small hazardous particles while performing daily job duties. Tyvek suits have protection built into their fabric.
- h. **Mask:** Mask refers to a standard surgical mask. Masks issued to inmates must have the metal nose bridge removed.
- i. **N95 Mask:** An **N95 mask** (also called a respirator) is a **mask** that is worn over the face to prevent the inhalation of airborne particles. The **N95** designation means that the **mask** will filter at least 95% of particles 0.3 microns in size.
- j. **Goggles:** Goggles or disposable face shield that fully covers the front and sides of the face).
 - i. This does not include personal eyeglasses.
 - ii. If reusable eye protection is used it should be cleaned and disinfected in accordance with manufacturer’s instructions.
- k. **Bleach Solution:** 5 (five) Tablespoons of bleach to 1 (one) gallon of water or 4 (four) teaspoons of bleach to 1 Quart. **This should be used within 24 hours of mixing.**
- l. **COVID-19 Test** – Any test approved by the Vermont Department of Health for the identification and diagnosis of an individual person as infected with the COVID-19 virus.

- m. **Cloth Face Covering** – mask made of available cloth to cover the nose and mouth. Not a surgical or N95 mask. Often handmade. Intended to help prevent spread of virus *from the wearer*.

Section 1: General Precautions

1. General Precautions

Throughout the duration of the COVID-19 pandemic the following general prevention measures should be implemented to interrupt viral infection transmission. These are listed in *Table 1* below.

Table 1. General Prevention Measures
<p>a. Promote good health habits among employees and incarcerated individuals:</p> <ol style="list-style-type: none"> 1) Avoid close contact with persons who are sick. 2) Avoid touching your eyes, nose, or mouth. 3) Wash your hands often with soap and water for at least 20 seconds. 4) Cover your sneeze or cough with a tissue (or into a sleeve). Then throw the tissue in the trash. 5) Greet without handshakes (or other touching). <p>b. Conduct frequent environmental cleaning of “high touch” surfaces.</p> <p>c. Institute social distancing measures to prevent spread of germs (e.g., minimize self-serve foods and group activities).</p> <p>d. Employees stay at home if they are sick.</p> <p>e. Influenza (flu) vaccine is recommended for persons not previously vaccinated.</p>

1. Good Health Habits

- a. Good health habits should be promoted in various ways (e.g., educational programs, posters, campaigns, assessing adherence with hand hygiene).
- b. This CDC website has helpful educational posters:
<https://www.cdc.gov/coronavirus/2019-ncov/communication/factsheets.html>
- c. Each facility should ensure that adequate supplies and facilities are available for hand washing for both incarcerated individuals and employees.

- d. Provisions should be made for employees and visitors and new intakes to wash their hands when they enter the facility.

2. Environmental Cleaning

- a. The frequency of routine cleaning of surfaces that are frequently touched should be increased. These can include doorknobs, keys, handrails, telephones, computer keyboards, elevator buttons, cell bars, etc..
- b. Each Superintendent will ensure their local cleaning schedule is reviewed and increased for the duration of this pandemic. Additional inmate labor may be utilized to accomplish this. Attention should also be given to the cleaning schedule for those areas where inmates are prohibited.
- c. Superintendents should ensure continual cleaning is occurring at all times – 24/7.
- d. Cleaning may be done using EPA-certified disinfecting wipes such as the “Red-capped PDI Sani Cloth Germicidal Wipes” or equivalent as available.
- e. The CDC also indicates that most common EPA-registered household disinfectants are effective for cleaning. Use disinfectants appropriate for the surface.
- f. Bleach Solution is a good cleaning solution and a good alternative that is readily available. **It should be used with 24 hours of mixing.**
 - 1. Bleach solution is 5 (five) tablespoons (1/3rd cup) bleach per gallon of water OR
 - 2. 4 (four) teaspoons bleach per quart of water.
- g. Follow manufacturer’s instructions for application and proper ventilation. Check to ensure the product is not past its expiration date.
- h. Never mix bleach with ammonia or any other cleanser.

2. Exclusion of Sick and Exposed Staff

1. COVID-19 could gain entrance to a facility via infected employees. Staff should be instructed to stay home if they have fever and respiratory symptoms.
2. If employees become sick at work, they should be advised to promptly report this to their supervisor and go home.
3. Employees should be advised to consult their healthcare provider by telephone.
4. If employees have been exposed to a known COVID-19 case as defined by the VTDOH, and if they have symptoms of fever, cough or difficulty breathing, they

- should call their healthcare provider.
5. Each Superintendent will ensure information is tracked regarding any employee that is sick or in-home quarantine.
 6. The Superintendent will review this information with the Central Operations Section to determine if a sick staff member had close contact with others and if any additional steps need to be taken to address this.
 7. During the COVID-19 outbreak (as at all times), staff are required to follow usual reporting rules for notifying their chain of command when they will be away from work due to illness or potential exposure.
 8. Upon arrival on-site, all staff and **all other personnel (including visitors, vendors, contractors)** entering the facility will be screened using [Attachment 10](#).
 9. Each Superintendent will determine where such screening will take place and will assign staff to perform the screening.
 10. The screener will wear PPE as follows: Gloves, goggles, and cloth face covering. (Cloth face covering will be provided by NSCF).
 11. Screening should take place as close to the entrance as reasonably possible and as soon as the staff member arrives.
 12. Staff who answer “yes” to any question will be sent home.
 13. All staff will be screened for fever with an infrared thermometer.
 14. Staff with temperatures at or above 100.4 will be sent home.
 15. Anyone who refuses to comply with the screening, including temperature check, will not be allowed entrance to the facility.
 16. A re-screening will not need to be done for staff exiting and re-entering the building on the same continuous shift.

3. Social Distancing

1. Various administrative measures will be implemented to reduce contact between people and the chance of spreading viruses.
2. In-person social visits have been suspended indefinitely. Ongoing review will be conducted to determine when reinstatement is appropriate.
3. GTL will provide one free video visit per inmate per week.
4. The restriction on the number of allowable purchased video visits per week has been temporarily lifted.

5. Volunteer activities have been suspended indefinitely. Ongoing review will be conducted to determine when reinstatement is appropriate.
6. RRP/CHSVT and other group activities have been canceled indefinitely. Further review will be conducted at that time to determine if reinstatement is appropriate.
7. Attorney Visits: Attorneys will be screened for illness and exposure. Attorneys who report symptoms or exposure will not be afforded entry at this time. Alternate means of communication (e.g., attorney lines) may be utilized to ensure lawyer-client contact.
8. Each Superintendent will review how to group inmates for medication and meals. There should be a time gap between groups. During that time gap, the area will be cleaned and disinfected.
9. At this time outdoor recreation will continue to be offered. Inmates will be encouraged to maintain a distance of 6 feet between each other. Indoor recreation (e.g., gym) will occur only by unit with disinfection in between uses.
10. Library books that have been in the possession of any inmate will, upon collection, be stored separately from other books for a period of 30 hours prior to being placed back into circulation.
11. All mail from outside the institution will be held for 24 hours before staff sort it. Each Superintendent will be responsible for identifying a location for this to occur. After the 24-hour period, mail may be sorted and delivered according to normal protocols.
12. Each Superintendent will implement methods to reduce movement of staff between units/buildings to the extent reasonably possible.

4. Cloth Face Covering

1. Wearing of Cloth Face Coverings - Staff

1. All staff, regardless of role, will wear a Cloth Face Covering when on-duty at a physical work site.
2. In accordance with guidance from the Vermont Department of Health, DOC encourages staff to wear these in public when off-duty.
3. A Cloth Face Covering is not a substitute for surgical masks or N95 masks when these are required.
4. Staff should familiarize themselves with requirements for use of PPE provided in Field and Facility Protocols.
5. In any situation that requires either a surgical mask or N95 mask, the Cloth Face Covering is to be removed and the appropriate mask applied.
6. Cloth Face Coverings will be removed if they become wet or soiled.

7. They will be put into the laundry and treated like laundry coming from Medical Isolation.
8. Staff will be provided with a clean Cloth Face Covering at the beginning of every shift.
9. Used Cloth Face Coverings will be placed in the designation mask collection area.

2. Wearing of Cloth Face Coverings - Inmates

1. All inmates are required to wear a Cloth Face Covering when outside of their cells.
2. Inmates must remove the covering if directed to by staff (e.g., for identification purposes or other security needs).
3. A Cloth Face Covering is not a substitute for surgical masks or other required PPE when these are required for completion of laundry, Biohazard Cleaning, or other tasks where PPE is specialized.
4. Staff should familiarize themselves with requirements for use of PPE provide in Field and Facility Guidance and ensure inmates undertaking special cleaning assignments are in compliance.
5. Cloth Face Coverings will be removed if they become wet or soiled.
6. Used Cloth Face Coverings will be kept in the cell in a mesh bag until laundry is collected.
7. Each facility will have an inmate laundry worker(s) in full PPE (with a surgical mask) collect these on 3rd shift.
8. When the coverings are picked up, the mesh bag will be placed in a plastic bag.
9. The same inmate that picks up the laundry will put it in the washer. It should be washed at the highest available temperature and should be completely dried.
10. Each facility will establish a process for re-issuing coverings to inmates.
11. VTDOC is actively working to create Cloth Face Coverings for inmates.
12. Until these are provided, inmates will be allowed to use improvised Cloth Face Coverings of their own manufacture provided these are consistent with this protocol.
13. Disciplinary Reports **WILL NOT** be issued for wearing a Cloth Face Covering worn in the manner prescribed in this protocol.
14. Each facility will ensure information regarding Cloth Face Coverings is communicated to the inmate population.

3. How to wear a Cloth Face Covering

1. Cloth Face Coverings should—
 - a. fit snugly but comfortably against the side of the face
 - b. be secured with ties or ear loops
 - c. include multiple layers of fabric
 - d. allow for breathing without restriction
 - e. be able to be laundered and machine dried without damage or change to shape
2. Individuals should be careful not to touch their eyes, nose, and mouth when removing their Face Covering and wash hands immediately after removing.
3. Cloth Face Coverings should not be placed on young children under age 2, anyone who has trouble breathing, or is unconscious, incapacitated or otherwise unable to remove the Covering without assistance.
4. Coverings should be routinely washed. A standard washing machine will wash these appropriately.

Section 2: Intake Screening

1. New Intake Screening

1. At this time, the State of Vermont, as well as all surrounding states, have ongoing community transmission of the virus. As a result, inmates coming into a facility from the community may have been exposed but not symptomatic.
2. All new intakes to a Correctional Facility will be placed on Intake Quarantine for a period of 14 days.

3. Any inmate who is brought outside the institution to a hospital ER will be put on Intake Quarantine. This is due to the inmate having had physical contact with healthcare professionals.
4. Any inmate who is brought outside the institution for a pre-scheduled appointment that does not involve the emergency room will not require quarantine; this would include the COGs clinic, dialysis, an urgent dental trip etc.. This may be reviewed by Dr. Fisher on a case by case basis if the medical staff have concerns about potential exposure during the planned trip.
5. When a new intake enters the sallyport, security staff will place a surgical mask on them. Security will wear gloves when greeting new intakes.
6. Security Staff will complete [Attachment 1](#).
7. For any new intake providing a positive result on this screening tool, security staff will don PPE (N95 mask and goggles.)
8. Security staff will perform necessary searches (pat or strip in accordance with existing directive).
9. All new intakes will be directed to wash their hands as a general health precaution.
10. Intakes who did not screen positive on [Attachment 1](#) will be processed in accordance with Quarantine guidance below.
11. Any intake who has screened positive on [Attachment 1](#) they will be placed in a cell by themselves until medical staff can complete their screening. Any time the cell door opens, the intake must wear their mask and staff who will be in contact must don PPE (gloves, N95 mask and goggles).
12. Medical will complete a second screening and consult with the on-call medical provider with regard to placement.
13. The medical provider will determine if placement on Isolation is appropriate.
14. Immediately upon confirmation of a positive screen by medical, the Incident Command System will be activated, and the **Central Office Operations Section will be notified.**

2. Personal Protective Equipment (PPE)

1. PPE will be used when any person comes into contact with any person with suspected, or confirmed, COVID-19.
2. N95 Mask/Respirator: See [Attachment 4](#) for information regarding how to conserve N95

masks.

- a. N95 respirators should not be worn with facial hair that interferes with the respirator seal.
3. Gown.
 - a. If gowns are in short supply they can be reserved for times when direct, close contact with a patient is anticipated.
4. Gloves.
5. Eye Protection (goggles or disposable face shield that fully covers the front and sides of the face).
 - a. This does not include personal eyeglasses.
 - b. If reusable eye protection is used it should be cleaned and disinfected in accordance with manufacturer's instructions.
6. It is strongly emphasized that hand washing occurs before and after donning and doffing PPE.
7. Staff anticipated to wear PPE should be trained on its use. CDC instructions are attached as [Attachment 5](#).
8. The Logistics Section Chief will be responsible for maintaining a current inventory of PPE and making arrangements to maintain a supply chain for this equipment.
9. Correctional staff are encouraged to use universal precautions in accordance with standard practice. The additional PPE as indicated in Attachments [2](#), [3](#), and [11](#) is required in the following situations:
 - a. **When entering any area designated as an Isolation or Quarantine area.**
 - b. **When transporting inmates from, or to, an Isolation or Quarantine area.**
 - c. **When duties will bring staff in close contact with inmates on an Isolation or Quarantine status.**
 - d. **Where a Use of Force appears likely (wear Gowns or Tyvek suits)**
 - e. **Staff will wear N95 masks while conducting mouth checks during medication pass.**
10. **Each facility will identify location(s) where doffing of PPE will take place. This should be as close as reasonably possible to where the PPE will be used.**
11. **Each facility will ensure appropriate receptacles (Red Bags/Biohazard) are present in these locations.**

3. Medical and Intake Quarantine

1. The purpose of Medical Quarantine is to ensure that incarcerated individuals who

are known to have been exposed to the virus are kept separate from other incarcerated individuals to assess whether they develop viral infection symptoms.

- a. Staff designated as vulnerable will not be used to work Isolation or Quarantine units, nor will they be assigned to transport inmates designated for Isolation or Quarantine. It is the staff's responsibility to notify their supervisor of this information and, if requested, to provide documentation from their healthcare provider.
2. As the precautions for medical and Intake Quarantine are identical, the same location will be used.
 3. Each Superintendent will identify a location for Medical/Intake Quarantine. At this time, there is not a designated statewide Medical Quarantine location.
 4. The door to the Quarantine Room/Unit should remain closed. A sign should be placed on the door of the room indicating that it is a Quarantine Room/Unit which lists recommended personal protective equipment (PPE) ([see Attachment 3](#)).
 5. To minimize the likelihood of disease transmission to fellow quarantined persons, those who are placed in quarantine should be required to wear surgical masks while in quarantine. Masks should be replaced as needed, if they become soiled or dirty, or at least every 8 hours.
 6. Quarantined incarcerated individuals should be restricted from being transferred to, or otherwise interpersonally interacting with, the general population.
 7. To the extent possible, all services (meals, medication, etc.) will be delivered in the cell.
 8. Meals will be served with disposable service. Nothing coming out of the quarantine area will be returned to the Kitchen.
 9. Anything coming out of the cell that cannot be disinfected (to include any trash) will be treated as medical waste (use red bag) and treated accordingly.
 10. Laundry should be placed in a mesh laundry bag and remain in the cell until it is ready to be washed. It will not be collected until it is ready to be washed. It will be picked up by an inmate in full PPE wearing a surgical mask. The same inmate that picks up the laundry will put it in the washer. Quarantine laundry should be completed during 3rd shift due to inmate wearing PPE.
 11. Laundry will be placed in a plastic bag. Anyone handling it will use Full PPE.

12. The Laundry Worker will wear full PPE, which includes wearing a surgical mask. It should be washed at the highest available temperature and should be completely dried.
13. Dedicated medical equipment (e.g., blood pressure cuffs) should be reserved and isolated from routine use equipment. When this is not possible, equipment will be decontaminated in accordance with manufacturer's instructions prior to use with other patients.
14. Each site will determine how showers and recreation will be offered to these inmates.
15. Such must be offered in a way that does not bring them into contact with any other inmates.
16. Any space used for this must be cleaned with a hospital-grade disinfectant prior to its use by any other population.
17. A surgical mask will be worn by staff who are in direct, close contact (within 6 feet) of quarantined incarcerated individuals.
18. Three times daily, medical staff will assess whether inmates in quarantine should be screened for symptoms including subjective fever and a temperature. Symptomatic patients need to be isolated or cohorted.
19. The duration of medical for COVID-19 is the 14-day incubation period.

4. Transport of COVID Infected/Suspected Inmate

1. The standards listed below will be utilized for transport in addition to normal transport protocols.
2. No inmate will be moved without notification and approval by **Central Office Operations Section**. Permission must be granted by **Central Office Operations Section** by the contact information provided.
3. Patient wears a surgical mask and washes their hands.
4. Correctional officer wears N95 mask and goggles. Wear gloves, gown, and eye protection if in close contact with inmate prior to transport.

5. Prior to transporting, all PPE (except N-95 respirator) is removed and hand hygiene (washing or thorough application of hand sanitizer with at least 60% alcohol) is performed. This is to prevent contaminating the driving compartment.
6. Ventilation system should bring in as much outdoor air as possible. Set fan to high.
7. DO NOT place air on recirculation mode.
8. Weather permitting, drive with the windows down.
9. Following the transport, if close contact with the patient is anticipated, put on new set of PPE. Wash hands after PPE is removed.
10. The vehicle must be cleaned in accordance with the below steps immediately after transport and prior to its use for any other transport.
11. After transporting a patient, air out the vehicle for one hour before using it without a N95 respirator.
12. When cleaning the vehicle, wear a disposable gown and gloves. A face shield or surgical mask and goggles should be worn if splashes or sprays during cleaning are anticipated.
13. Clean and disinfect the vehicle after the transport utilizing a hospital-grade disinfectant
14. If a decision is made to transport a patient with signs and symptoms of severe respiratory illness to a healthcare facility, the sending facility will notify the receiving healthcare facility of the pending transport of a potentially infectious patient. Each Superintendent will be responsible for establishing contact with the local hospital in advance to identify any special instructions they currently have for receipt of patients requiring a higher level of care.

5. Medical Isolation

1. **Placing a mask on potentially infectious persons is critical.** If individuals are identified with symptoms, *immediately place a surgical mask on the patient* and have them wash their hands.
 - a. Staff designated as vulnerable will not be used to work Medical Isolation or Medical Quarantine units, nor will they be assigned to transport inmates designated for Isolation. It is the staff's responsibility to notify their supervisor of this information and, if requested, to provide documentation from their healthcare provider.
2. Each Superintendent will designate an area for initial Medical Isolation.
3. This should allow for as much separation from staff and inmates as possible. This will ideally be a single cell located a physical distance from other cells.
4. Northwest State Correctional Facility and Southern State Correctional Facility are the primary isolation cells because they have negative pressure cells for a capacity of 10.
5. Northeast Correctional Complex (Building 2) is the secondary Medical Isolation unit for an additional 69 beds.
6. Chittenden Regional Correctional Facility, Alpha Unit is dedicated for female Medical Isolation with a total capacity of 15 beds.
7. The inmate will be issued a surgical mask.
8. Any inmate in isolation will not leave the cell unless there is a critical health related event. Hygiene will be practiced using a cloth and basin.
9. To the extent possible, all services (meals, medication, medical care, etc.) will be delivered in the cell.
10. Meals will be served with disposable service. Nothing coming out of the Isolation area will be returned to the Kitchen.
11. The facility will ensure measures are in place to support adequate hydration by the inmate(s.)
12. Anything coming out of the cell that cannot be disinfected (to include any trash) will be treated as medical waste (use red bag) and treated accordingly.
13. Laundry should be placed in a mesh laundry bag and remain in the cell until it is ready to be washed. It will not be collected until it is ready to be washed. Inmate in full PPE wearing a surgical mask. Same inmate that picks up the laundry will put it in the washer. Isolation laundry should be completed during 3rd shift due to inmate wearing PPE.
14. Laundry will be placed in a plastic bag. (Anyone handling it will use Full PPE.)

15. The Laundry Worker will wear full PPE which includes wearing a surgical mask. It should be washed at the highest available temperature and should be completely dried.
16. Laundry, sheets, blankets will not be shaken prior to washing or at any other time.
17. Any time the cell door is opened, the inmate must wash their hands and don their mask.
18. If a phone call is allowed, it must be done from within the Isolation Area; this may require use of a portable phone/phone on a cord stretched into the area. At the conclusion of the call, the inmate will disinfect the phone and return it to staff. Staff will then re-disinfect the phone.
19. Once the inmate is in possession of a tablet, any social calls can be made using the tablet.
20. Any time contact is anticipated, staff will don PPE (gloves, gown, N95 respirator, and goggles).
21. The door to the Respiratory Infection Medical Isolation Room/Cell should remain closed. A sign should be placed on the door of the room indicating that it is a Respiratory Infection Isolation Room/Unit and lists recommended personal protective equipment (PPE) (see [Attachment 2](#)).
22. Dedicated medical equipment (e.g., blood pressure cuffs) should be reserved and isolated from routine use equipment. Where this is not possible, equipment will be decontaminated in accordance with manufacturer's instructions prior to use with other patients.
23. The facility will contact the Facility Group Supervisor and notify them that they have an inmate designated for Isolation.
24. Central Office will coordinate transport to one of the designated Isolation locations.
25. After any designated quarantine or isolation area is vacated, it shall be thoroughly cleaned.
26. When cleaning, wear a disposable gown and gloves and N95 respirator and goggles.
27. Clean and disinfect the area utilizing a hospital-grade disinfectant. [See detailed cleaning process below](#)
28. Determination for ending the isolation is a medical decision that will be made by the medical provider.

Section 3 – Internal Screening

1. Ongoing Internal Screening – Inmate Directed

1. Regular communication will be provided to the inmates encouraging them to report symptoms.
2. Inmates who experience coughing, shortness of breath, or believe they have a fever are to report this directly to the unit officer.
3. The officer will immediately issue a surgical mask to the inmate (and cellmate) and direct both to lock in.
4. The officer will contact Medical.
5. The officer will notify the CFSS.
6. Medical staff will determine whether to see the inmate where they are or whether the inmate should be brought to Medical or directly to Isolation.
7. If staff directly observe the symptoms, they shall treat the situation as if the inmate self-reported and follow the same protocol.

2. Ongoing Internal Screening – Correctional Staff Directed

1. At each cell inspection (1st and 2nd shift), the unit officer will ask each inmate if s/he is experiencing coughing, shortness of breath, or fever.
2. The unit officer will immediately provide a surgical mask to any inmate (and their cellmate) reporting symptoms.
3. At the conclusion of cell inspection, and prior to releasing the unit, the officer will report any positive responses to medical.
4. The officer will notify the CFSS.
5. The cell(s) will stay locked in until medical screening takes place.
6. Medical staff will determine whether to see the inmate where they are or whether the inmate should be brought to medical or directly to Isolation.

3. Ongoing Internal Screening – Peer Directed

1. If another inmate reports a peer is experiencing symptoms, staff shall treat the report as

positive, as delineated in Part 1.

2. The affected inmate and cellmate will be issued masks and restricted to their cell.
3. The officer will contact medical.
4. The officer will notify the CFSS.
5. Medical staff will determine whether to see the inmate where they are or whether the inmate should be brought to medical or directly to Isolation.
6. Any abuse of this peer report system (e.g., intentionally false reporting to harass staff or peers) will be dealt with as a disciplinary issue.

4. Ongoing Internal Screening – Medical Staff Directed

1. Medical Staff will collect and review all sick call slips at least twice daily.
2. Medical will also continue ongoing inmate education especially regarding good health practices.

5. Ongoing Internal Screening – Temperature Checks

1. Each facility will establish a process to take the temperature of all inmates daily.
2. An infrared thermometer will be used when available
3. If such is not available, the thermometer must be sanitized between use.
4. The staff member taking the temperatures will wear PPE as follows: Gloves, goggles, surgical mask, and gown. (Surgical masks will be provided by NSCF)
5. Any temperature exceeding 100.4F/38C will be treated as a positive result.
6. The officer will immediately issue a surgical mask to the inmate (and cellmate) and direct both to lock in.
7. The officer will contact Medical.
8. The officer will notify the CFSS.
9. Medical staff will determine whether to see the inmate where they are or whether the inmate should be brought to Medical or directly to Isolation.

6. Movement of Symptomatic Inmates to Medical/Isolation.

1. **Placing a mask on potentially infectious persons is critical.** If individuals are identified with symptoms, *immediately place a surgical mask on the patient* and have them wash their hands.
 - a. Staff designated as vulnerable will not be used to work Medical Isolation or Medical Quarantine units, nor will they be assigned to transport inmates designated for Isolation. It is the staff's responsibility to notify their supervisor of this information and, if requested, to provide documentation from their healthcare provider.
2. Each Superintendent will designate an area for initial Medical Isolation.
3. The inmate will perform hand hygiene (either wash hands or use of alcohol-based sanitizer.)
4. The inmate will be directed to sit in a wheelchair. A clean sheet will be placed over them from the neck down to cover the clothes.
5. They will be escorted by staff; staff will wear gloves and a N95 Mask. A gown will be added if they expect to come into physical contact with the inmate.
6. Staff will open all doors.
7. The inmate will be escorted to the area designated by medical.
8. Medical will complete their screening and provide further directions regarding next steps.
9. If it is determined that the inmate is to be placed on Medical Isolation, Facility Administration will assist medical in determining if there are other individuals who have had close contact who require quarantine.

Section 4 – Operation of Designated Medical Isolation Units

1. Males - NWCF/SSCF

1. **Placing a mask on potentially infectious persons is critical.** If individuals are identified with symptoms, *immediately place a surgical mask on the patient* and have them wash their hands.
2. The negative pressure cells will be utilized.
3. The inmate will be issued a surgical mask.
4. To the extent possible, all services (meals, medication, etc.) will be delivered in the cell.
5. Meals will be served with disposable service. Nothing coming out of the Isolation area will be returned to the Kitchen.

6. The facility will ensure measures are in place to support adequate hydration by the inmate(s.)
7. Anything coming out of the cell that cannot be disinfected (to include any trash) will be treated as medical waste (use red bag) and treated accordingly.
8. Laundry should be placed in a mesh laundry bag and remain in the cell until it is ready to be washed. It will not be collected until it is ready to be washed. It will be collected by an inmate in full PPE, which includes wearing a surgical mask. The same inmate that picks up the laundry will put it in the washer. Isolation laundry should be completed during 3rd shift due to inmate wearing PPE.
9. Laundry will be placed in a plastic bag. (Anyone handling it will use Full PPE.)
10. The Laundry Worker will wear full PPE, which includes wearing a surgical mask. It should be washed at the highest available temperature and should be completely dried.
11. Any time the cell door is opened, the inmate must wash their hands and don their mask
12. If a phone call is allowed, it must be done from within the Isolation Area; this may require use of a portable phone/phone on a cord stretched into the area.
13. At the conclusion of the call, the inmate will disinfect the phone and return it to staff.
14. Staff will then re-disinfect the phone.
15. Once the inmate is in possession of a tablet, any social calls can be made using the tablet.
16. Any time contact is anticipated, staff will don PPE (gloves, gown, N95 mask, and goggles).
17. The door to the Respiratory Infection Isolation Room/Cell should remain closed. A sign should be placed on the door of the room indicating that it is a Respiratory Infection Isolation Room/Unit and lists recommended personal protective equipment (PPE) (see [Attachment 2](#)).
18. Dedicated medical equipment (e.g., blood pressure cuffs) should be reserved and isolated from routine use equipment. When this is not possible, equipment will be decontaminated in accordance with manufacturer's instructions prior to use with other patients.
19. Any inmate in Medical Isolation will not leave the cell unless there is a critical health-related event. Hygiene will be practiced using a cloth and basin except for those areas where a shower is built into the cell.
20. After any designated quarantine or isolation area is vacated, it shall be thoroughly cleaned.
21. When cleaning, wear a disposable gown and gloves and a surgical mask or respirator and goggles.

22. Clean and disinfect the area utilizing a hospital-grade disinfectant. [See detailed cleaning process below](#)

2. Females - CRCF

1. **Placing a mask on potentially infectious persons is critical.** If individuals are identified with symptoms, *immediately place a surgical mask on the patient* and have them wash their hands.
2. Alpha Unit will be used. When possible, only a single side of the unit will be used.
3. The inmate will be issued a surgical mask.
4. To the extent possible, all services (meals, medication, etc.) will be delivered in the cell.
5. Meals will be served with disposable service. Nothing coming out of the Isolation area will be returned to the Kitchen.
6. The facility will ensure measures are in place to support adequate hydration by the inmate(s.)
7. Anything coming out of the cell that cannot be disinfected (to include any trash) will be treated as medical waste (use red bag) and treated accordingly.
8. Laundry should be placed in a mesh laundry bag and remain in the cell until it is ready to be washed. It will not be collected until it is ready to be washed.
9. Laundry will be placed in a plastic bag. (Anyone handling it will use gloves.)
10. The Laundry Worker will wear full PPE, which includes wearing a surgical mask. It should be washed at the highest available temperature and should be completely dried.
11. Any time the cell door is opened, the inmate must wash their hands and don their mask
12. If a phone call is allowed, it must be done from within the Isolation Area; this may require use of a portable phone/phone on a cord stretched into the area. At the conclusion of the call, the inmate will disinfect the phone and return it to staff. Staff will then re-disinfect the phone.
13. Once the inmate is in possession of a tablet, any social calls can be made using the tablet.
14. Any inmate in Medical Isolation will not leave the cell unless there is a critical health related event. Hygiene will be practiced using a cloth and basin.
15. Any time contact is anticipated, staff will don PPE (gloves, gown, N95 mask, and goggles).
16. The door to Alpha Unit should remain closed. A sign should be placed on the door of the room indicating that it is a Respiratory Infection Isolation Unit and lists

recommended personal protective equipment (PPE) (see [Attachment 2](#)).

17. Dedicated medical equipment (e.g., blood pressure cuffs) should be reserved and isolated from routine use equipment. When this is not possible, equipment will be decontaminated in accordance with manufacturer's instructions prior to use with other patients.
18. After any designated quarantine or isolation area is vacated, it shall be thoroughly cleaned.
19. When cleaning wear a disposable gown and gloves and N95 respirator and goggles.
20. Clean and disinfect the area utilizing a hospital-grade disinfectant. [See detailed cleaning process below](#)

3. Med Surge – NECC

1. Additional Isolation Housing capacity will be at the Medical Surge site located at NECC.
2. Operations there will be guided by the NECC Action Plan.

Cleaning – Isolation Spaces

1. Wearing full PPE (Gown/Tyvek Suit, N95, gloves and goggles), spray the cell with bleach solution using the sprayer.
2. Attention should be paid to ensure the odor of bleach is not overwhelming in any adjacent occupied area.
3. If possible, open outside windows to increase air circulation in the area.
4. Wait at least 4 (four) hours (but up to 24 if possible) before proceeding to the next step.
5. Clean and disinfect all areas (e.g., cells, bathrooms, and common areas) used by the infected individual, focusing especially on frequently touched surfaces
6. **Hard (non-porous) surface cleaning and disinfection**
 - a. If surfaces are dirty, they should be cleaned using a detergent or soap and water prior to disinfection.
 - b. For disinfection, use Bleach Solution or ES-64. Oxivir wipes may also be used for frequently touched or difficult to clean surfaces.
7. **Soft (porous) surface cleaning and disinfection**
 - a. For soft (porous) surfaces such as carpeted floors and rugs, remove visible contamination if present and clean with appropriate cleaners indicated for use on these surfaces. After cleaning:

- i. If the items can be laundered, launder items in accordance with the manufacturer's instructions using the warmest appropriate water setting for the items and then dry items completely.
- ii. Otherwise, use products [that are EPA-approved for use against the virus that causes COVID-19 and are suitable for porous surfaces.](#)

8. Electronics cleaning and disinfection

- a. For electronics such as tablets, touch screens, keyboards, and remote controls, remove visible contamination if present.
 - i. Follow the manufacturer's instructions for all cleaning and disinfection products.
 - ii. Consider use of wipeable covers for electronics.
 - iii. If no manufacturer guidance is available, use alcohol-based wipes or spray containing at least 70% alcohol to disinfect touch screens. Dry surfaces thoroughly to avoid pooling of liquids.

Section 5 – Releases

The directions below are steps to be taken in addition to, not in lieu of, normal release processes. This is to include victim services notifications. All standard release procedures must still be followed.

The Facility is currently conducting multiple daily screenings by using Attachment 1 pursuant to the Facility COVID-19 Guidelines.

Release from General Population with [Negative Screen:](#)

1. Inmates with a negative screen will be released following standard release procedures and provided the handouts listed at the end of this section.

Release from General Population with [Positive Screen follow steps 1-5:](#)

1. Inmates who screen as positive will be given a mask and directed to don it. They will be isolated until their release and will be evaluated for possible COVID testing (when the nature of the release allows for this delay).
2. Upon a positive screen, a test is to be ordered prior to release.
 - Test can be completed through mobile testing at Harbor Place by facilitated by Community Health Center of Burlington. The provider would contact Kerry Goulette at CHCB at 802-540-8951.

- If test result not yet received, complete attached HIPPA and referral forms to arrange for placement at Harbor Place (802)- 353-7112.

Release from Quarantine due to Contact Tracing or Isolation follow steps 3-5:

3. At the direction of the Vermont Department of Health (VDH), as soon as Department of Corrections (DOC) is aware that a COVID-19 positive inmate or a quarantined inmate is scheduled for release:
 - The caseworker will send an email to the address below copying Tyler Prue: covid19.healthcarecontacttracing@vermont.gov with the subject line “COVID-19 Positive Inmate Scheduled for Release.” (Or notify designated VDH Point of Contact once identified)
 - In the email, provide:
 - i. Name
 - ii. Date of birth
 - iii. Contact information for inmate
 - iv. Contact information for emergency contacts
 - v. Permanent address
 - vi. Address where they will be going after release
 - vii. Date of release
4. At the request of VDH, **Medical staff** who perform medical screening before release will:
 - Review with the inmate how to determine when they have recovered from COVID-19 and are considered non-infectious:
 - i. Recovery is when *all three* of the following have occurred:
 1. It has been three full days of no fever without the use of fever-reducing medication
 2. Other symptoms have improved, and
 3. At least seven days have passed since any symptoms appeared.
 - Review with the inmate guidance for isolation until they have recovered from COVID-19 by using the document provided by VDH titled [Isolation Criteria to review what activities are restricted during isolation](#)
 - If the inmate is confirmed positive and still contagious the Chittenden Recovery Center is to be notified at (802) 241-0457
 - DOC Caseworker will discuss and develop with the inmate a safe plan for housing during recovery to include
 - i. A determination of where the inmate will go after release that will allow them to self-isolate.

- If the inmate does not have a safe housing option, the case worker will refer to the [Chittenden Recovery Center \(CRC\) Referral Guide](#).
 - Discuss a safe plan for transport to housing
 - i. If a safe plan does not exist, ([Attached ESD Referral for Harbor Place](#))
 - ii. Provide the inmate with a mask to wear during transport
5. VDH will initiate contact with the inmate after discharge to:
- Emphasize isolation criteria.
 - Review criteria for recovery and non-infectiousness.
 - Conduct contact tracing for close contacts during infectious period; and
 - Verify that the inmate is in a living situation that enables isolation.

Upon Release all Inmates will Receive the Following Handouts Provided by DOC and VDH:

1. [What to do if you're a close contact of someone with COVID-19 \(link is external\)](#)
2. [What to do when sick with COVID-19](#)
3. [What to do when diagnosed with COVID-19](#)
4. [Isolation Criteria](#)
5. DOC Care Package- which includes hand sanitizer, gloves, facial mask

Section 6 - Mental Health and Substance Abuse Disorder Supplemental Support

A variety of Mental Health and Substance Abuse Disorder worksheets will be made available to inmates for supplemental support during the COVID-19 pandemic.

These will be made available in 4 (four) ways.

1. General Provision

1. MH and SUD staff may identify ([from the attached 2 indexes](#)) the worksheets that are likely to have the widest applicability.
2. These can be provided in bulk to each unit for any inmate requesting such.
3. Unit Officers will be responsible for notifying the designated person at each site when supply runs low.

2. In Response to Medical Slips

When an inmate submits a medical slip (sick slip) where a worksheet is deemed an appropriate response (either in its entirety or supplemental to other care), the responding Centurion employee will provide a worksheet.

3. By Request

1. Each Superintendent will work with the Health Services Administrator (HSA) to determine the most effective way to make these available by request.
2. Use the index as an order sheet.
3. Publicly post the index and have inmates submit a Request form to a designated staff member for copies.
4. Other methods as determined locally.
5. Any method must allow for private request and return of sheets.

4. Targeted intervention

1. MH and SUD staff are encouraged to use proactive targeted distribution of these worksheets to specific inmates with whom they are familiar and believe may benefit.
2. Particular attention should be paid to inmates designated SFI and worksheets relevant to their specific situation may be provided.

5. Communication with Inmates

1. The Superintendent will ensure that these worksheets are available and that the request methods for them are clearly communicated to the inmate population.
2. It is recommended that multiple methods of communication are utilized.

Attachment 1. COVID-19 New Intake Screening Form

1. Assess for Signs or Symptoms of Illness <ul style="list-style-type: none"> Persons with symptoms of illness or cough should be masked immediately and separated from others. <p>Do you have a...</p>		Date of Onset:
<input type="checkbox"/> Yes <input type="checkbox"/> No	Fever (100.4°F/38°C) // Record temperature: <u> </u>°F/ <u> </u>°C	
<input type="checkbox"/> Yes <input type="checkbox"/> No	Cough	
<input type="checkbox"/> Yes <input type="checkbox"/> No	Shortness of Breath	
3. If <i>YES</i> to ANY question, place in person in <i>ISOLATION</i>.		
4. Contact Dr. Fisher (or designee) for review and determination as to <i>ISOLATION</i> or <i>QUARANTINE</i>.		

Inmate Name: _____ Number: _____

	Gloves <i>Guantes</i>
	GOWN <i>Bata</i>
	Eye Protection <i>Protección para los ojos</i>
	Ensure that the door to this room remains closed <u>at all times</u>. <i>Asegurese de mantener la puerta de esta habitación cerrada <u>todo el tiempo</u>.</i>

Attachment 3. Quarantine Room Sign

Quarantine Room Precautions <i>PRECAUCIONES de Sala de Cuarentena</i>	
TO PREVENT THE SPREAD OF INFECTION, ANYONE ENTERING THIS ROOM SHOULD USE: <i>Para prevenir el esparcimiento de infecciones, todas las personas que entren a esta habitacion tienen que:</i>	
	HAND HYGIENE <i>Hygiene De Las Manos</i>
	Face Mask <i>Mascara facial</i>
	Eye Protection <i>Protección para los ojos si contacto cercano</i>
	Gloves <i>Guantes</i>
	Ensure that the door to this room remains closed <u>at all times</u>. <i>Asegurese de mantener la puerta de esta habitacion cerrada <u>todo el tiempo</u>.</i>

Attachment 4 – N95 Respirator Use

N 95 respirator use, N95 filters at least 95% of airborne particles.

Strategies for conserving N95 respirators as approved by the National Institute for Occupational Safety and Health (NIOSH)

Use hand hygiene before and after touching or adjusting.

Extended use: continuous use for repeated close contact encounters, can function within design specification for 8 hours of continuous or intermittent use.

Reuse: If officer leaves unit for bathroom or break remove the N95 without shaking it and put it into a paper bag with name on it wash hands. Use clean gloves when donning a used N95 and performing a user seal check. Discard gloves, wash hands.

Discard mask if contaminated with any bodily fluids, if obviously damaged or becomes hard to breathe through.

Implement “just-in-time” fit testing. Plan for larger scale evaluations, training and fit testing. Limit respirators during training, allow limited re-use of respirators by individuals for training and then fit testing.

Attachment 5 – PPE Sequence

See separate Attachment

Attachment 6 How can I Protect Myself

Vermont is currently under a Stay Home, Stay Safe Executive Order. The Governor's order directs Vermonters to stay at home, leaving only for essential reasons, critical to health and safety. If leaving the home, Vermonters should adhere to social distancing policies, including remaining six feet from others (except for those with whom they share a home) and thoroughly and regularly washing hands.

Take these everyday preventive actions to help stop the spread of germs:

- Stay at least 6 feet away from others.
- Stay home as much as possible.
- Avoid close contact with people who are sick.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Avoid close contact with people who are sick.
- If you must go out, practice social distancing.
- Cover your coughs and sneezes with your sleeve or a tissue, then throw the tissue in the trash and wash your hands.
- Clean and disinfect frequently touched objects and surfaces using a regular household cleaning spray or wipe
- Wash your hands often with soap and water for at least 20 seconds. If soap and water are not available, use an alcohol-based hand sanitizer. Always wash your hands if your hands are visibly dirty.

If you have been in close contact with a person with COVID-19, and develop a fever, cough or have difficulty breathing, contact your healthcare provider right away.

CLEANING YOUR HANDS

CDC recommends the following for hand hygiene:

Household members should clean their hands often, including immediately after removing gloves and after contact with someone who is ill, by washing hands with soap and water for 20 seconds. If soap and water are not available and hands are not visibly dirty, an alcohol-based hand sanitizer that contains at least 60% alcohol may be used. However, if hands are visibly dirty, always wash hands with soap and water.

Attachment 10 Facility Staff Screening Tool

- It is suggested that this form be laminated. Upon arrival to the facility the employees are asked to respond verbally to these questions and a temperature taken.
- If an answer to one of the questions is YES or a temperature exceeds 100.4, then issue the employee a mask to wear, contact the on-duty CFSS, and send the employee home. Recommend that they call their supervisor and consult with their primary care provider.
- A written copy of this form is NOT required. Any positive results will be reported on the Line List.

Today or in the past 24 hours have you had any of the following symptoms?	
Fever, felt feverish, or had chills?	Yes ____ No ____
Cough that is abnormal for you?	Yes ____ No ____
Difficulty Breathing?	Yes ____ No ____
Temperature	Yes ____ No ____

Attachment 12 – Testing Addendum

COVID-19 GUIDELINES – Testing

Testing

1. Any inmate presenting to medical with any symptom indicative of possible COVID-19 infection will be screened by a nurse. The inmate should be wearing a mask, if not one will be provided.
2. A rapid-flu test will be conducted where medically indicated.
3. The nurse will review results of this screening with Centurion’s Regional Medical Director, or designee.
4. The Regional Medical Director or designee will determine the necessity for Medical Isolation, Medical Quarantine, and will order a COVID-19 Test when medically appropriate in accordance with the most current guidance from the VT Department of Health.
5. Such testing will be conducted in accordance with the guidance provided by VDH or local labs and only by appropriately trained medical personnel.

Test Sample Transportation Process

1. Follow these instructions if your site is not listed below with specific instructions.
2. The lab request must be complete by the medical staff and indicate the sample is from an incarcerated person, this will ensure prioritization.
3. The medical staff will prepare the sample for transport.
4. The samples are to go to the hospital local to that facility.

NSCF- Test Sample Transportation Process

1. Ensure all paperwork is complete and it indicates HIGH PRIORITY INCARCERATED INDIVIDUAL.
2. Test samples are to go to North Country Hospital. There is no courier service for this hospital. It will need to be transported by a staff member.

3. Once a test is taken and transport of the sample is needed, medical will call **Orin Martin** at 802-334-3222 and provide him the time the sample will arrive. A minimum of a ½ hour advance notice is required to allow the hospital to plan for an expedited pick up from the staff transporting the sample.
4. Transport staff are to enter the Emergency Entrance with the sample for delivery.

CRCF- Test Sample Transportation Process

1. Be sure the paperwork is complete and indicates HIGH PRIORITY INCARCERATED INDIVIDUAL.
2. Your samples will go via courier so the 3rd bag will need to go into a Styrofoam or hard sided box, the couriers may not take the samples if not in this box.
3. Medical staff will call 802-**847-7754** to arrange a pick-up when/if you need a sample taken to the lab.

MVCF- Test Sample Transportation Process

1. Be sure the paperwork is complete and indicates HIGH PRIORITY INCARCERATED INDIVIDUAL.
2. Monday to Friday, from 0530 to 1800, call x1760
 - a. Inform the lab staff member of a specimen drop off.
 - b. Lab staff member will meet person with specimen at Stratton Rd entrance.
 - c. Lab staff will verify specimen and information and assume control of materials.
3. Monday to Friday, after 1800, call x1771
 - a. Follow same process as above.
4. Samples coming from the DOC have priority for processing to our reference labs for testing the lab.

NECF- Test Sample Transportation Process

1. Be sure the paperwork is complete and indicates HIGH PRIORITY INCARCERATED INDIVIDUAL.
2. Medical personnel will prepare the sample for transport.

3. Samples for COVID 19 testing must be delivered to NERMC Mon-Fri by 3pm, Saturday by 12:00pm, Sunday by 10:00 am.
4. The samples should be delivered to the hospital through the business center office doors.
5. The person delivering will have their temp checked before being allowed to deliver to the lab.
6. Refrigerated samples are stable x 72 hours if you are outside of the delivery hours.
7. Please call the lab in advance if you are sending a COVID 19 sample **802-748-7458**. The lab manager is **Jeannie McBride**.

NWSCF- Test Sample Transportation Process

1. Be sure the paperwork is complete and indicates HIGH PRIORITY INCARCERATED INDIVIDUAL.
2. Samples will be received Monday-Friday 6am-6pm, Saturday 8am-12pm.
3. Take it to the main medical office building 133 Fairfield St.
4. Expect to answer screening questions and have a temp check.
5. There will be a greeter to direct you to the outpatient lab.
6. Outside of the hours above the sample can be taken to the ER. The lab number is **802-524-1070**.

SSCF- Test Sample Transportation Process

1. Be sure the paperwork is complete and indicates HIGH PRIORITY INCARCERATED INDIVIDUAL.
2. Samples for testing for CVD19 should be brought into the hospital through the main door, there is a person at the desk who will provide directions to the lab.
3. If after **5pm please call 802-885-7695** directly to the lab and someone will assist you in delivering the test.
4. For general lab questions call **802-885-7692**. Attachment 13 – SMART Recovery

SMART Recovery Toolbox

The SMART Recovery Toolbox provides a variety of methods, worksheets, and exercises to help you self-manage your addiction recovery and your life. This collection of sensible tools is based on developing cognitive thinking skills to support you through addiction recovery.

Attachment 15 - Harbor Place Isolation Housing

Harbor Place Isolation Housing: A public health intervention necessary to stop the spread of COVID 19
Guest Agreement: Your Rights and Responsibilities

To reach the front desk, dial 0 or 985-0058. If no one answers, dial 862-6244. For Emergencies, dial 9-1-1

Criteria In order to be a guest at Harbor Place you must:

- Be suspected of being positive for COVID-19
- Be able to manage your own activities of daily living
- Have no other suitable place to self-quarantine/isolate (to support healthy recovery and prevent infecting others)
- Be able to follow Responsibilities as listed below
- Choose to be here (isolating at this site is voluntary)

Your Rights: What you can Expect from Us; We are glad that you are here and you can expect the following from us:

- Supportive staff on site to help ensure your needs and the needs of others are met
- Clean bedroom and bathroom when you arrive, and supplies to keep it clean
- Three meals a day delivered to your room
- Security onsite to ensure that it is a safe environment for you and others

Your Responsibilities: What we Expect from You For your health and safety and the health and safety of others, we ask you to accept the following responsibilities. If you do not act according to these responsibilities, you may be asked to leave:

Health and Wellbeing

- You are responsible for your own health. Please pay attention to how you are feeling and let your medical provider know if you start to feel ill and we will ensure that you get the medical care you need.
- Please maintain personal hygiene.

- Please keep your room clean, and clean up after yourself, using disinfecting supplies to clean surfaces every day.
- Please always wear a face mask and gloves when you are around others.
- Please take care of yourself, rest to support your recovery, and remain safe.
- Please be respectful of others, including other guests, staff, and volunteers.

Staying at the Harbor Place

- Governor Scott announced a “Stay Home, Stay Safe” order for all residents, asking everyone to stay home, which applies here, too.
- While you are staying at Harbor Place, you must remain onsite at all times. Visitors are not permitted except as pre-arranged with the front desk, for deliveries to be dropped off on the porch of the office.
- You may go outside for fresh air onsite on the premises so long as you maintain a distance of at least six feet from others who may be outside. You are required to stay on the premises, and that is monitored by staff. If you have children with you, they must be supervised at all times while outside.
- Alcoholic beverages may not be consumed outside of rooms.
- Smoking is not permitted in the rooms. You will be asked to leave and may be subject to a \$100 charge if there is smoking in your rooms. You may smoke outside with room doors closed and ten feet away from the building.
- In-room local phone service is available.
- Single rooms include a mini-fridge and microwave. Efficiency rooms include a refrigerator and stove. Guests may not use their own cooking devices, including hot plates and electric fry pans, within any room of the premises and may not use any open flame cooking device on the premises, including grounds and decks.
- No pets are allowed. Service animals assisting persons with disabilities are permitted.
- Registered sex offenders are not permitted to stay due to the vulnerability of other guests and will be asked to leave if found to be on the registry.
- If you decide to end your stay at Harbor Place, we can arrange transportation to a reasonable destination within the State. Once you leave Harbor Place you may not be able to return.

Behavior

- If you are required to follow certain restrictions or conditions from other programs, you are expected to follow them here.
- If you are found to be selling drugs on the property, we will notify the police, and obtain a no trespass order.

Weapons, violence and threatening behavior are not allowed.

- You must be clothed and have shoes or slippers on at all times.
- If you violate these guest rules, you may be asked to leave.

Personal Items • Please take with you any items that you bring.

By signing below I agree that I have read this agreement and understand my rights (what I can expect from Harbor Place) and my responsibilities (what is expected of me, and that I must follow) that are listed above.

_____ (Other, specify)

What to do if you are diagnosed with COVID-19

Isolate at home:

- Don't leave home, except to get medical care. Call ahead before visiting a health care provider or emergency department.
- Most people with mild illness can recover at home. While there is no specific treatment for COVID-19, you should get plenty of rest, drink plenty of fluids, and take fever-reducing medication if needed.
- As much as possible, stay in a specific room in your home and use a separate bathroom. Stay at least six feet away from others in your home at all times. Don't share household items.
- Have someone else care for your pets. Although no animals have been reported to get sick with COVID-19, people with the virus should limit contact with animals until more information is known. If you do care for your pet, wash your hands before and after.
- Stay connected with others – use technology to communicate with friends and family.

Daily cleaning and washing:

- Clean and disinfect surfaces in your separate room and bathroom. Have someone else clean the other areas of your home.
- Thoroughly wash household items, like utensils, after using.
- Wash your hands often with soap and water for at least 20 seconds. Use alcohol-based hand sanitizer if soap and water aren't available.

When to get medical care immediately:

If you have difficulty breathing, chest pain, confusion, or changes in color on your lips, gums, face, around the eyes, or nails, seek medical care immediately. When you call for medical care, tell the provider or 911 that you have COVID-19 and are isolating at home.

Tell people who you have been in close contact with to quarantine at home – even if they don't have symptoms:

- The Health Department will call you and help you identify people that were in close contact with you during your infectious period, which starts the day before any symptoms began, and continues until you have [recovered](#).
- Advise your close contacts to quarantine at home. Share the [“What to do if you are a close contact of someone who is diagnosed with COVID-19”](#) guide with them.
- Close contacts of your close contacts do not need to follow the guidelines, unless they have symptoms.
- Close contact means being within six feet for a long time. Close contact does not mean being more than six feet away in the same indoor environment for a long period of time, walking by, or briefly being in the same room.

Examples of close contacts	Examples of NOT close contacts
People living in the same home	Cashier at the grocery store
Intimate partners	Pharmacists who gave you medication
People who rode in the same car while you were infectious	The person in front of you in line at the store
Friends who had dinner together while you were infectious	Coworker who briefly walked by to ask a question

It's safe to stop home isolation when you've recovered. This is when **all three things** have happened:

1. It's been three full days of no fever without the use of fever-reducing medication, **and**
2. Other symptoms have improved, **and**
3. At least seven days have passed since your symptoms first appeared.

Difference between isolation and quarantine

	Self-isolation	Self-quarantine
For whom?	People with symptoms of COVID-19 <ul style="list-style-type: none"> • For people with COVID-19 who aren't sick enough to be hospitalized, or • For people who are waiting for test results 	People with no symptoms of COVID19 <ul style="list-style-type: none"> • Close contacts of people with COVID19
For how long?	Until recovery, which happens when all three have happened: <ol style="list-style-type: none"> 1. It's been three full days of no fever without the use of fever-reducing medication, and 2. Other symptoms have improved, and 3. At least seven days have passed since your symptoms first appeared. 	For 14 days since the date of possible exposure. The day of the exposure is Day 0.
What does it mean?	Staying in a separate room in the house, using a separate bathroom, avoiding contact with others.	Staying home 24/7, monitoring for symptoms, and practicing social distancing. If possible, using a separate room and bathroom. If you become symptomatic, your close contacts should also self-quarantine.
